Service: Electrical Distribution Equipment and Engineering Services

Eaton is a power management company with more than 100 years of experience providing energy efficient solutions that help our customers effectively manage electrical, hydraulic, and mechanical power. Eaton has approximately 102,000 employees and sell products to customers in more than 175 countries.

Eaton's Electrical Engineering Services & Systems Division offer a portfolio of services to help you to insure that reliable, efficient and safe power is available when it's needed most. With unparalleled knowledge of electrical power management across industries, experts within Eaton's Electrical Engineering Services & Systems deliver customized, integrated solutions to solve our customers most critical challenges.

Eaton's Electrical Engineering Services & Systems Division offer a full-range of solutions to the hydroelectric industry in the areas of;

- Ground Grid/GPR Studies
- Civil, mechanical, and electrical design services
- Electrical distribution equipment and switchgear (Generation and Balance of Plant)
- Substation class transformers
- Protection & control/SCADA design-build solutions
- LED facility lighting, cable tray, and wiring devices
- Turnkey project solutions and construction management
- Start-up and commissioning services
- Life cycle management programs
- Equipment rehabilitation, reconditioning, and modernization

Eaton's Electrical Engineering Services & Systems offers a comprehensive portfolio of support tailored for every stage of a power systems life cycle. Through our design, build, and support services, we are dedicated to understanding your challenges and ensuring that your entire electrical infrastructure functions at its highest level.
