

## HYDRO TURBINE TECHNOLOGY BY MAVEL

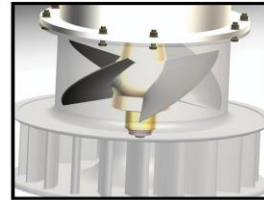

FRANCIS

KAPLAN

PELTON

MICRO

[www.mavel.cz](http://www.mavel.cz)

Mavel is a leading global supplier of hydroelectric turbines and related equipment for both new and refurbishment projects around the world. With over 100 proprietary Kaplan, Francis, Pelton and micro turbine designs for generating units of up to 30 MW, Mavel is able to provide the best alternative for both low and high head installations.

Mavel's range of turbines includes the following:

- Kaplan (Vertical, Pit, S, Z, Bulb)
- Francis
- Pelton
- TM Modular Micro

The company has signed contracts for or installed 470 turbines at approximately 300 sites in 36 countries around the world. Projects underway include projects in the Republic of Belarus, Bulgaria, Canada, Japan, Laos, Lithuania, Panama, Poland, Slovakia, Ukraine and the USA. Mavel has ISO 9001:2008, 14001:2004 and 3834-2:2005 certification and all turbines are designed, engineered and produced at Mavel's manufacturing facilities in the Czech Republic.
